DOSPrint
Version 2003.03.03

## Conditions for using DOSPrint

- DOSPrint is free for general use without restriction.
- DOSPrint may not be resold.
- DOSPrint is provided as is, without any warranty or guarantee.  A.N.D. Technologies, Inc. is not responsible for any data loss resulting from your use, non-use, or misuse of DOSPrint.
- Technical support is not available.

## What is DOSPrint?

DOSPrint is software which captures LPT ports to any print queue.
(Requires Windows NT 4.0, 2000, or XP - Windows 9x is not supported)

- DOSPrint can capture LPT1-LPT9 to any local or network print queue.
- Local print queues do not need to be shared.
- Capture directly to NDPS printers without requiring a legacy NetWare print queue.
- Capture directly to local LPT, USB, or TCP/IP printers without requiring sharing.
- Runs in the system tray for easy access.

## DOSPrint comes in 2 flavors.

**DOSPrintUI.exe** - A user-mode GUI which requires a local administrator logon or equivalent.
**DOSPrint.exe** - A combination service/GUI which allows capture port assignments via command-line or through the system tray applet, and works with all logged on users.

## Using DOSPrintUI

Run DOSPrintUI.exe, either manually, or via startup shortcut, etc.

Double-click or right-click on the ![icon] icon in the system tray for options.
There is no need to use DOSPrintUI if the DOSPrint service is running.
Note: DOSPrintUI will not work for local non-administrators.

## Installing the DOSPrint service

DOSPrint.exe is a service.  Nothing will occur if DOSPrint is not installed and running as a service.

**To install DOSPrint:**
Copy DOSPrint.exe to the SYSTEM32 directory.
Type: dosprint install
Type: net start dosprint

**Batch file example:**
```
@echo off
copy d:\path\dosprint.exe %SystemRoot%\system32
dosprint install
net start dosprint
```

## Removing the DOSPrint service

Type: dosprint remove
Type: del %SystemRoot%\system32\dosprint.exe

## Using DOSPrint when the service is running

Double-click or right-click on the ![icon] icon in the system tray for options.

**Command line options:**

| | |
|---|---|
| DOSPrint lptX printerName | Capture lptX to printerName |
| DOSPrint lptX /d | Remove lptX capture |
| DOSPrint status | Display capture status |
